VoIP/SIP Network Settings Worksheet

A/V Integrators and IT managers - use this form to streamline the network setup process of ClearOne products with VoIP/SIP interfaces. The VH20 (and similar products) require the use of a standard SIP connection with any VoIP enabled system; this may require the purchase of additional software/licenses from a third party vendor.

Configuring a ClearOne VoIP enabled product requires the information asked in this worksheet. Please coordinate with the site IT manager to obtain the information prior to installation.

Basic Settings

Phone Number:_____

Authorization User:_____

Authorization Password:_____

Will this device obtain an address from a DHCP Server? **Yes / No**

Proxy IP Address/URL:_____

Note: Enter the above address as the Dial Plan Domain Name/IP Address
