intimus Hammer SES

The intimus Hammer SES implements firmware-based erasure command to completely purge all data from hard drives.
These easy to use, one-step devices can be connected to complete server racks with up to 30 hard drives.
For onsite data purging, the compact, portable products operate as stand-alone devices... or connect to the CPR Toolbox software utility (included) for additional functionality.

- Maximum productivity: process up to 30 hard drives simultaneously (SCSI)
- Hard drives may be re-used - promoting better environmental stewardship
- Useable as a stand-alone device or in connection with any standard PC (via USB)

Technical data

Drive interfaces:	SCSI 50 pin (2) & SCSI 68 pin (2)
Host interface:	USB 2.0
Input voltage:	+ 12 VDC
Max. input current:	3,5 A
Voltage to drives:	+ 12 VDC, 5+ VDC
Device addressing support:	28 / 48 Bit
Max. transfer mode:	UDMA mode 4
Device addressing support:	ATA 4 - ATA 7
Warranty on machine:	2 years
Packing unit:	1
