

eBeam® Digital Ready™ Whiteboards

Enable Interactivity in Minutes

eBeam Digital Ready bridges the gap between marker-based and interactive whiteboards. For those who want to gradually transition to interactivity, eBeam Digital Ready provides a modularized path with immediate and long-term benefits.

Whiteboard

eBeam Digital Upgrade

Fully featured boards allow interactive note capture, live annotations, remote meetings and more

Benefits

- Lowers total whiteboard investment cost
- Simplifies installation
- Provides flexible upgrade options
- Standardizes and simplifies facility planning process
- Meets long and short-term capture needs
- Protects investment—50 year surface guarantee surpasses competition
- GREENGUARD certified boards help achieve clean air in facilities

With pre-built partitions for cords and cables, Digital Ready whiteboards combine sleek design with installation ease. The multi-purpose whiteboards provide a rock-solid surface for handwritten notes. Once a facility decides to add interactive features, a simple eBeam Digital Upgrade transforms boards to lively collaboration spaces in minutes.

Schools and buildings can now purchase and install just one board for all whiteboard needs.

With an eBeam Digital Upgrade, users have the the ability to mark up anything projected from a computer and enliven PowerPoint presentations, documents and web pages.

The iconic eBeam tool palette is intuitive and feature-packed.

Every annotation on the board is captured so important ideas are never lost and notes can be shared over the Internet in real time, sent via email or edited at a later date. For educators, a library of items provide rich content for presentations. Graphics, photographs and animation that help engage participants can be easily dragged and dropped onto a presentation. Users can choose the file format that works best – including jpeg, pdf and Microsoft PowerPoint – to share presentations and lessons.

The Digital Ready board from Claridge is solid steel, with a fusion bonded porcelain surface that provides a combination writing and projection surface that's scratch and stain-resistant. Low-gloss, colorfast and magnetic, the porcelain surface is guaranteed for 50 years or the life of the building. Claridge's LCS-II porcelain surface has been GREENGUARD certified.

With buy now, upgrade later abilities, a durable, multi-function whiteboard surface and limitless presentation abilities, Digital Ready whiteboards offer form, function and affordability.

“Learning styles, interests and backgrounds differ greatly from one of my students to the next. As a teacher, it's my goal to level the learning field, and [eBeam technology] allows me to do that.”

Jeff Caswell,
Seventh-Grade Math Teacher
Arlington Middle School
Arlington, Tennessee
