

The economic audio/visual mobility and security solution!

The new **RM eCart** is a steel-constructed fully-configured mobile interactive teaching center. The **RM eCart** has an upgraded wheel system and rigid design expected of more expensive mobile carts. It comes fully loaded with the high-quality equipment needed to implement whole-class interactive lessons in any classroom. Since the carts are easily transportable into any room within a school building, the **RM eCart** is an effective way to increase the ROI of your technology expenditures.

The **RM eCart** comes complete with: a BenQ DLP projector that features a 2700 lumens lamp – ideal for larger spaces or bright rooms – and BrilliantColor™ technology for more vibrant colors and sharp images; a Toshiba SDV296 DVD/VCR, a full-featured DVD/VCR combo player with ColorStream Pro® progressive scan component video output for enhanced color purity and image detail; and a Cyber Acoustics CA-3602 2.1 speaker system that generates 30 Watts of crystal clear sound.
