

# 5" modero® widescreen touch panel

## EXPECT NOTHING LESS

Using a smaller touch panel shouldn't mean you have to sacrifice the range of multimedia features you get with larger models. The 5" Modero Widescreen offers what no other panel of its size on the market can — audio/video-ready capabilities, a 16x9 widescreen user interface and the unique AMX Modero design all rolled into an unbelievably sleek Wall/Flush Mount display.

## PERFECTLY DISCREET.

The 5" Modero Widescreen fits discreetly on the wall, making it the perfect solution for smaller wall spaces. In the home, for example, it offers just the right amount of control in the foyer, hallways, kitchen, bedroom and bathroom. A popular solution in education and corporate settings, this panel provides convenient and seamless one-touch control from the entryways into offices, at the head of meeting rooms, and in lecterns and podiums. In fact, you'll hardly know it's there thanks to the panel's ultra-slim bezel design.

## PREPARE TO FLIP OUT

Literally. Feel free to position the 5" Modero Widescreen with programmable pushbuttons located across the top or bottom of the bezel. It simply depends on how you prefer to view and take control of the user interface. A unique AMX feature "flips" the text, icons and video windows as needed, so no matter which way you choose to display the panel — pushbuttons up or pushbuttons down — everything appears on-screen as it should.
