To shred a ream of paper...

...then walk away!

The Boxis™ AutoShred™ is a revolution in document destruction. We are proud to bring to market the Boxis™ AutoShred™ series of paper shredders that has a paper tray capacity of up to 700 sheets.

Our innovative paper feeder mechanism grabs the documents from the middle and feeds them into the solid steel cutters. It does all this while barely making a whisper so nobody in the near vicinity even knows a shredder is running. Yes, the Boxis™ AutoShred™ is whisper quiet so it will not drive your phone loving colleagues crazy!

Automation of menial tasks has driven American productivity for decades. What is more menial than standing in front of a shredder, counting out ten to twenty sheets of paper at a time, feeding it in, and waiting a minute only to do the same thing again and again. This is unproductive, boring and a waste of time and money.

We say
**LET THE MACHINE
DO THE WORK!**

why buy?

productivity

It only takes a few seconds to drop in up to 700 sheets, lock with a four-digit PIN, press start and let the Boxis™ AutoShred™ start destroying the documents without you having to wait in front of it. Shredding 700 sheets manually is tedious and time consuming.

The S700 has a 700-sheet capacity and can destroy a full load in 9-12 min. The R700 has a 700-sheet capacity and can destroy a full load in 18-24 min. You don't need to stand there while the paper is destroyed. Let the machine do the work. Save time and money.

design

The BOXIS™ AutoShred is compact, durable and powerful with a sleek and elegant design that fits nicely into any office environment.

security

Nothing is safer than destroying sensitive documents yourself. Allowing third party vendors to enter your office and remove your corporate secrets is an unnecessary risk. Every company has some information that if leaked into the wrong hands could be catastrophic. Why risk it? Don't outsource critical tasks that can easily and cost effectively be carried out in-house. The S700 model shreds a letter size sheet into over 2000 particles. The R700 model shreds a letter size sheet into over 1000 particles.

technical specifications
