

PLUS

Make your meeting more productive and creative.
You can save your ideas simply and quickly in digital format.

Three choices of configuration to suit your use.

The M-5 comes standard with a wall-mount kit. Additionally, you may also acquire the optional partition hanger kit for hanging the copyboard in any cubicle. Also available is the optional stand kit for mounting the board in either a horizontal or vertical position (see below).

M-5

Two ways to save your hand-written notes:
Built-in memory or a CompactFlash card.

Built-in memory for simple ease of use

A CF card for data security or larger storage capacity

Just push the MEMORY button on the control panel, and the image drawn on the board is saved to the built-in memory. The built-in memory is recognized automatically (Plug & Play) when you connect the M-5 to your computer using the included USB cable.*

*With Windows XP, 2000, and ME. A dedicated driver is required for Windows 98SE.

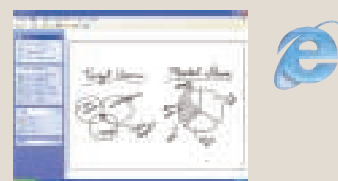

Insert a CompactFlash card (sold separately), and whenever you push the MEMORY button, the image is saved. The CompactFlash card solution gives you two big advantages; larger memory capacity and data security.

*CF card is abbreviation for CompactFlash card.

The images are saved in black & white.

And of course.....

You can utilize the data using your computer.

You can save, e-mail or paste your meeting minutes or ideas in digital format using the M-5 and your computer.* There is no need to install any special software.

* TIFF and PNG formats are supported.

You can print out the image using your computer and printer.

Use your computer to print-out the data.

*The bundled PLUS Image Viewer software allows you to simply and easily view and print the image data.

You can place the M-5 copyboard anywhere you like.

C a s e 1

Wall-mount for your office

A lightweight and space-saving solution that weighs only 27lbs.

C a s e 2

In cubicles

Perfect for small meeting rooms and cubicles.

C a s e 3

Stand-mounted in horizontal orientation

You won't lose any of the fresh ideas from your meetings. The elegant design will suit the most stylish office environment.

C a s e 4

Stand-mounted in vertical orientation

Just like a flip-chart, the vertical position lets you use the M-5 anywhere.

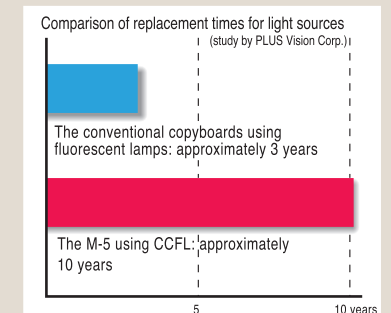

Mobility

The stand with rolling casters makes it easy to move the M-5 anywhere you like.

Maintenance-free

The cold cathode fluorescent lamp (CCFL) used for the M-5 eliminates the need for periodic maintenance.

Data capacity of the built-in memory

The typical data size per page in TIFF or PNG format is approx. 100KB (varies with content). The 1.8 MB built-in memory will hold approximately 20 pages.
