

One of the Secrets of Successful Companies

Interactive Whiteboard

UB-T780

- A large 77-inch screen for high-impact images
- Suppressed light reflection and durable surface
- Convenient electronic pen
- Convenient applications for meetings and presentations
- Easy driver and software set-up

Active! Visual!

Panasonic ideas for life

elite Business Support

The elite Panaboard makes every meeting and presentation more eye-catching, more effective, and more active.

The elite Panaboard UB-T780 is an entirely new kind of electronic whiteboard that uses a projector to display PC images onto its surface and lets the presenter operate the data on the board with an electronic pen that works like a PC mouse. It adds an exciting visual element to meetings that used to be all talk and few pictures, and brings rich, paperless expression to presentations that previously depended on stacks of paper handouts.

The elite Panaboard Can Change Your Business.

Active Opinion Exchanges elite Meeting

Before

- When good opinions came up, they couldn't be added to the documents during the meeting.
- When new information was required for the meeting, an Internet search had to be done on a separate PC, which was time-consuming.
- Because everyone was busy taking notes, they couldn't concentrate on the meeting itself. Distributing paper documents also took time, and new information was hard to share.

After

- The electronic pen lets us instantly add notes to the meeting materials on the elite Panaboard, and we can save the results electronically without having to stop the meeting.
- We can show Internet searches* right on the elite Panaboard, so everyone sees the information immediately.
- The board content can be instantly saved as electronic data and shared by e-mail or other means.

*PC with Internet access is required

<Application Example-Office Design Meeting>

The elite Panaboard book and images from the Gallery can be used to show suggested changes to the office layout, with before-and-after images to make it easier to understand. Once the meeting is finished, the selected layout can be distributed in data form. This kind of meeting, which used to depend entirely on complex discussions, becomes highly efficient and productive.

More Efficient, More Effective elite Presentation

Before

- Participants had to continually look back and forth between a handful of paper documents and the board, so they weren't able to concentrate on the board content.
- If the timing wasn't just right between the person operating the PC and the person making the presentation, the participants lost interest.
- All presentations tended to look the same, and it was difficult to find ways to hold everyone's attention.

After

- Everything for the presentation -- text, graphs, and images -- is displayed on the board. This allows participants to focus only on the board.
- The PC can also be operated directly from the board, so there is no time lost and presentations move along smoothly at the presenter's own pace.
- Functions like the Screen Shade, which lets you hide part of the screen and then dramatically reveal it, and the Magnifier, which enlarges small or detailed parts, help to keep everyone interested.

<Application Example-Product Launch Meeting>

In a presentation describing one of your company's new products, you can display a table comparing the features of your product with those of a competitive product, then use the electronic pen to add information for a visual, easy-to-understand comparison. You can also use the Attachment function in the elite Panaboard book to store the URL of the competitor's Website, so you can easily access it and show it on the Panaboard during the presentation. These functions will make your presentations more persuasive and hold your customers' attention.

Easier, Cleaner and More Convenient Multi-Functional Electronic Pen

The electronic pen developed by Panasonic puts new functions in the palm of your hand and makes the board a more effective business tool. Unlike with conventional whiteboard systems, Panasonic's electronic pen also works as an eraser -- so you don't have to put it down and find a separate device every time you want to make a change. This also helps keep the board uncluttered.

It's Like Right Clicking with a PC Mouse Easy Push-and-Press Operation

Simply pushing the button and pressing the pen tip to the board surface serves the same function as clicking the right button of a PC mouse. Pushing the button and quickly double-clicking the board changes the indication immediately to a pointer (arrow tool), even when using a different tool. This easy two-in-one operation brings greater convenience and efficiency to any meeting.

elite Software Makes Business More Active

Create Materials with Panasonic Tools "elite Panaboard book"

The "elite Panaboard book" consists of a set of tools that were developed by Panasonic. You can use them to create and save presentation materials. Choose from a wide variety of arrows, graphics, and illustrations to liven up your meetings.

A Handy Bookmark Function Attachment

Use the Attachment function to make and store shortcuts to materials you have prepared with the elite Panaboard book and files you want to use, or links to Internet URLs. Having these information sources at your fingertip will make your presentations go like clockwork.

Enlarge and Display Small Details Magnifier

You can enlarge small details like tiny characters or photos for easier viewing. When you have meetings with a large number of people, this lets you enlarge important parts of the image so people far from the board can see them clearly.

Drawing Tool

The toolbar contains all of the software tool icons for easy selection. It can be constantly displayed on the board, ready for use at any time.

Use Familiar Software PowerPoint Mode

You can use your PowerPoint® application right on the elite Panaboard, so you no longer have to operate a second PC separately. Plus, once you've started up the PowerPoint® application, you can make notes to each slide with the electronic pen for a smoother, more effective presentation.

Quickly Save Screen Images as Data Screen Capture

This function lets you capture the images on the elite Panaboard and save them as electronic data. You can save the data in either of three formats, bmp, jpg, or tif, and distribute it as an e-mail attachment. This makes it easy to quickly save important screen images while your meeting proceeds smoothly.

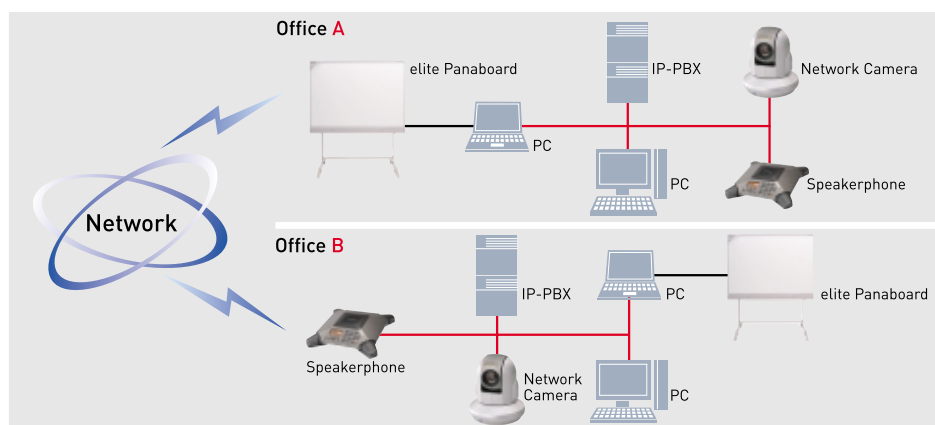

Easy Data Input Screen Keyboard

Simply display this keyboard on the elite Panaboard, then use the electronic pen to press the keys. In addition to text, you can enter numbers into Excel or other applications, and make corrections right on the board without having to use a PC and without taking valuable time away from the meeting.

Smooth Meetings Even at a Distance A Remote Conferencing System Using the Elite Panaboard

You can easily configure a remote conferencing system using a Panasonic network camera, a speakerphone and a PC, together with an existing phone line and Internet connection. By adding the elite Panaboard to this system, you can e-mail images from the board to people in other locations, for quick and easy information sharing.

UB-T780 Specifications

General	
Power Supply	AC 100-240 V, 50/60 Hz
Power Consumption	0.1 A (Standby/Operation)
External Dimensions* (HxWxD, without stand)	52.8" x 69.0" x 3.50" (1,340 x 1,752 x 89 mm)
Panel Dimensions* (HxW)	46.3" x 66.6" (1,175 x 1,692 mm)
Effective Area	45.9" x 59.1" (1,165 x 1,502 mm)
Weight* (without stand)	57.3 lbs (26 kg)
Panel Surface	PET coated metal plate
Interactive Function	
Interface	USB 2.0
Battery for Electronic Pen	LR03(AAA size) x 1 Alkaline battery (included)
Position Sensor	Ultrasonic receiver & infrared rays sensor

* Dimensions and weights are approximate.

Design and specifications are subject to change without notice.
